

TOOLING AND AUTOMATION

- **SRE and Production Engineering both require heavy amounts of automatic and autonomously functioning tooling and detection.**
- **You'll find that both areas tend to invest heavily in orchestration software (Packer, Chef, Kubernetes, etc), monitoring and alerting (observability), and all things tooling/automation.**

WHEN YOU CAN SAVE EVERYONE A SECOND A DAY, BUT HAVE 1000 DEVELOPERS... YOU'VE ACTUALLY SAVED 17 MINUTES. OR ABOUT 68 HOURS (1.5 WEEKS!) OF DEVELOPER TIME.

YOU ARE A FORCE MULTIPLIER.
