

WHAT IS A STORY?

When you consider a story is a “set of events (or descriptions of events) that lead to a target destination”, then many things fit that description. Things like:

- This lecture
- Oral communications
- A comment online
- A text message / conversation
- An email
- An assignment
- Describing your code change to someone so they can review it
- The code itself
- Literally anything that communicates anything

HOW TO GET TO THE TARGET DESTINATION
